

WAIT... THEY PUT THAT IN THEIR MOUTH?

"You Can't See It. But KARU Can Clean It."

VEGETABLES & FRUITS

3-5 Mins

- Removes Pesticides, Wax & Other Residues:** Effectively breaks down pesticide residues and synthetic wax coatings, ensuring produce is cleaner and safer to consume.
- Antibacterial & Antifungal:** Eliminate harmful bacteria and fungi, significantly reducing the risk of microbial contamination and foodborne illnesses.
- Enhances Texture:** Improves the firmness of fruits and vegetables, helping them retain their crispness and texture during storage.
- Preserves Freshness :** Reduces Ethylene Gas & helps slow down the ripening process, keeping your produce fresh longer.

MEAT & SEAFOOD

5-10 Mins

- Neutralizes Odors & Surface Bacteria:** Soaking meat and seafood with Karu Powder helps neutralize odors and remove surface bacteria, improving cleanliness and safety before cooking.
- Prevents Cross-Contamination:** By reducing the presence of harmful bacteria on the surface of meats and seafood, it helps reduce the risk of cross-contamination in the kitchen
- Reduces Foodborne Illnesses:** Helps to remove pathogenic bacteria like Salmonella and E. coli, both of which can lead to food poisoning if not properly cleaned.

5-10 Mins

BABY ITEMS

- Gentle & Safe for Babies:** This natural cleaning solution is non-toxic and gentle, making it ideal for cleaning baby bottles, utensils, and toys.
- Naturally cleans, disinfects, and deodorizes:** Items like baby bottle mouthpieces, which are frequently exposed to milk and saliva, can easily become breeding grounds for bacteria
- Removes Odors & Neutralizes Acidity :** Helps eliminate lingering smells from milk, food, or formula by neutralizing acids and organic matter, leaving items fresh and odor-free

- Karu Calcium Powder** creates a mildly alkaline solution that helps eliminate bacteria, viruses, and fungi –keeping baby items hygienic without using synthetic disinfectants.
- Breaks Down Milk & Saliva Residue:** Bottle nipples, pacifiers, and utensils can build up milk proteins and saliva enzymes. Calcium hydroxide breaks down these organic residues, ensuring a deeper clean.

30s-1 Mins

RICE & GRAINS

- Cleans Residues & Debris:** It also removes surface residues, such as husks, dirt, or chemicals used during processing, leaving you with cleaner rice or grains.
- Removes Bugs & Insects:** Rice and grains are often stored in conditions where bugs, such as weevils or larvae, may be present. Soaking rice and grains in this solution helps flush out bugs, eggs, and larvae, disrupting egg shells, preventing hatching, and deterring egg-laying by altering pH and creating an inhospitable environment.
