## KARU CLEAN ALL-PURPOSE POWDER

"Clean Greens & Produce for everyone"

### What is Karu Clean Powder?

Karu Clean Powder is a natural, food-safe cleaning powder made from 100% Japanese scallop shells. When dissolved in water, it releases ionic calcium, creating a powerful alkaline solution that helps remove:

- Pesticides and chemical residues
- Bacteria and germs (up to 99.9%)
- Parasites, dirt, and odor-causing agents

### Did you know?

**Most of the food we eat — from apples to rice — can carry more than just nutrients.**

- 🌿 Fruits and vegetables are often coated in waxes, pesticides, and chemical preservatives to extend shelf life and improve appearance.
- 🍚 Grains like rice can contain residual pesticides, dust, and even insect eggs from harvesting and storage.
- 🍖 Meat and seafood may be exposed to bacteria, parasites, and harmful contaminants during processing.

**Even after rinsing with water, many of these residues remain.**

### What Makes it Superior

**Most of the food we eat — from apples to rice — can carry more than just nutrients.**

- 🌿 Fruits and vegetables are often coated in waxes, pesticides, and chemical preservatives to extend shelf life and improve appearance.
- 🍚 Grains like rice can contain residual pesticides, dust, and even insect eggs from harvesting and storage.
